Portfolio: sadep-pahasara.github.io/Myportfolio/

PROFESSIONAL SUMMARY

Motivated Software Engineering student with a strong interest in software development, web technologies, and application design. Experienced in developing academic and personal projects involving web applications, database-driven systems, and Python-based applications. Familiar with multiple programming languages, frameworks, database technologies, and version control tools. Eager to apply technical knowledge, strengthen practical development skills, collaborate with experienced professionals, and contribute to real-world software projects through a Software Engineering Internship.

EDUCATION

2026 (Nov) | BSc in Software Engineering (Expected)
ICBT / (Degree awarding institution not yet confirmed)

2024–2026 | Higher National Diploma (HND) in Software Engineering
ICBT Campus

2023/2024 | G.C.E. Advanced Level (A/L)
Mahanama Central College, Monaragala
Results: 1C, 2S

TECHNICAL SKILLS

Programming Languages
Python Java C C++ C# JavaScript PHP

Web Development
HTML5 CSS3 JavaScript React Node.js .NET

Databases
MySQL SQLite Microsoft SQL Server

Development Tools & Design
Git/GitHub Figma Blender Claude AI tools

Other
VS Code Postman

LANGUAGE

English – Good working proficiency
Sinhala – Native

PROJECT EXPERIENCE

1 ORION — Personal AI Assistant
- Developing a Python-based personal assistant focused on AI-assisted interactions and desktop functionality.
- Exploring integration of online AI capabilities with local command execution.
- Working with Python and PySide6 for the application interface.

Technologies: Python, PySide6, Git/GitHub

2 SentinelX — Smart Wearable Safety Band
- Working on an IoT-based industrial worker safety project combining wearable sensors with an Android application.
- Exploring worker health monitoring, fall detection, emergency alerts, and location tracking.
- Contributing to application development and hardware integration.

Technologies: Java, Android Studio, SQLite, ESP32, Arduino IDE

3 Nugelanda School LMS
- Designing a web-based Learning Management System and School Management System for Grades 1–13.
- Planning role-based access for administrators, teachers, students, and parents/guardians.
- Working on requirements, permissions, and database design.

Technologies: HTML, CSS, JavaScript, PHP, MySQL

4 Cozy Comfort — Inventory and Order Management System
- Developing a database-driven web application for a blanket manufacturing, distribution, and sales business.
- Working on inventory management, customer orders, stock replenishment, and order fulfilment workflows.

Technologies: C#, ASP.NET, SQL Server / LocalDB

WORK EXPERIENCE

CCTV Operator
Protective Force, Colombo, Sri Lanka | May 2025 – October 2025
- Monitored CCTV surveillance systems to observe activities and identify potential security concerns.
- Maintained awareness of monitored areas and reported suspicious activity when required.
- Followed security procedures and supported day-to-day surveillance operations.

PROFESSIONAL STRENGTHS

- Problem-solving and analytical thinking
- Interest in learning new technologies
- Software development and project-based learning
- Team collaboration and communication
- Adaptability and willingness to learn
- Attention to detail

CAREER OBJECTIVE

To secure a Software Engineering Internship where I can apply my academic knowledge, contribute to practical software development projects, learn industry-standard engineering practices, and grow into a capable software developer.
